

VISION

My vision for AIM-IRS encompasses a rebirth that will make us a more valued commodity in the Service and the community. In the life cycle of any organization, there are choice-points that become the launch pad towards the next tier of success. Our organization's inception proved our motivation & desire to combat injustices in the workplace. Our longevity attests to our insight & strength of developing tools and strategies to navigate ever-changing environments that attempt to thwart individual progress. Now it is time to surmount the cloaked barriers that stifle our organization's momentum towards destiny
